

future of earth wikipedia - *the biological and geological future of earth can be extrapolated based upon the estimated effects of several long term influences these include the chemistry at earth s surface the rate of cooling of the planet s interior the gravitational interactions with other objects in the solar system and a steady increase in the sun s luminosity,*
weird life must life be based on carbon and water - *science fiction writers love to speculate on the possibility of non carbon weird life does the chemistry of such possible biomolecules support such ideas*
